

Vineti offers the first commercial, cloud-based platform to expand patient access to individualized medicine. Our solution combines industry-leading software expertise with first-hand knowledge of cell and gene therapies.

The Vineti platform is a single end-to-end solution that provides patient onboarding, treatment ordering and scheduling, supply chain orchestration, chain of identity resource planning, regulatory compliance, reimbursement, and customer experience.

Our software solution delivers secure, traceable **Chain of Custody** and **Chain of Identity** at every stage. The Vineti platform is available in modules that can be packaged and customized to fit your business stage, needs and workflows.

### **Point-Of-Care Collection**

Software used during the collection process that extends your current good manufacturing practice (cGMP) into the Point-Of-Care setting to comply with regulatory quality standards

### **Supply Chain Orchestration**

End-to-end orchestration of critical supply chain events including automated courier scheduling, raw material delivery, courier integration, and tracking of kit, raw and final products

### **Mission Control Center**

A single source of transparency and visibility into your end-to-end process that allows you to address supply chain and manufacturing events in real-time

### **Ordering & Scheduling**

Streamline complex ordering, coordination and scheduling of collection, manufacturing, and treatment administration

### **Resource Manager**

Optimize your resources and capacity to fulfill incoming orders reliably

### **GMP Supply Chain & Regulatory Reporting**

Automated reporting for quality reviews and regulatory document production, including Chain of Identity and Custody audit trails

### **Security & Compliance**

Validated software that is compliant to GAMP5, Privacy Laws, 21 CFR Part 11 and HIPAA. GDPR in process for Q2 2018.

### **Comprehensive Integrations**

System integrations to ERPs, manufacturing software, supply chain, couriers, CRM, MDM, Customer Service Apps
