

## Vineti is the essential software solution to drive and scale personalized therapeutic innovation

Align and manage the end-to-end operational workflow to provide personalized therapeutics more safely and efficiently. Vineti's Personalized Therapy Management (PTM) software empowers innovators of autologous and allogeneic cell and gene therapies, as well as personalized cancer vaccines. Vineti also supports effective integrations with key internal systems and the drug product ecosystem.

### KEY FEATURES

- Workflow alignment and optimization
- Automated COI, COC
- Sophisticated scheduling, worldwide

### Industry-leading usability

The Vineti software platform and modules are designed to enable each stage of therapy development while supporting a wide array of process requirements. Stakeholders engage via simple, intuitive interfaces — enabling faster therapeutic progress.

### Clinical and commercial support

Vineti is a safe, secure, seamless, and scalable software solution to help orchestrate therapies from early phase through to commercialization. No matter the phase, Vineti supports therapeutic growth.

### Compliance

With the flexibility and scalability that the cloud offers, Vineti ensures conformance with regulations and standards (HIPAA, GAMP5, 21 CFR Part 11, GDPR, NIST) while providing updates should requirements evolve.

### Comprehensive cloud-based systems integration

This robust technology solution allows therapy developers to work with IT systems of their choosing while integrating existing workflows and the broader drug product ecosystem.

## Vineti integrates and aligns personalized therapy workflows

Vineti makes roll-out and operations easier

### REAL-TIME, ORCHESTRATED DATA AND NOTIFICATIONS INCLUDE:

- Therapy order submitted
- Therapy order approved
- Shipment delayed
- Order cancelled
- Collection cancelled
- Manufacturing failed

ORDERING & SCHEDULING

COLLECTION

TRANSPORTATION

MANUFACTURING

DELIVERY

### USER ROLES AND PERMISSIONS

- Align and manage many user roles with one cloud-based system

### COMMERCIAL SCALE

- Mission control dashboard
- cGMP collection application
- Reimbursement
- Patient and customer experience/engagement

### SUPPLY CHAIN OPTIMIZATION

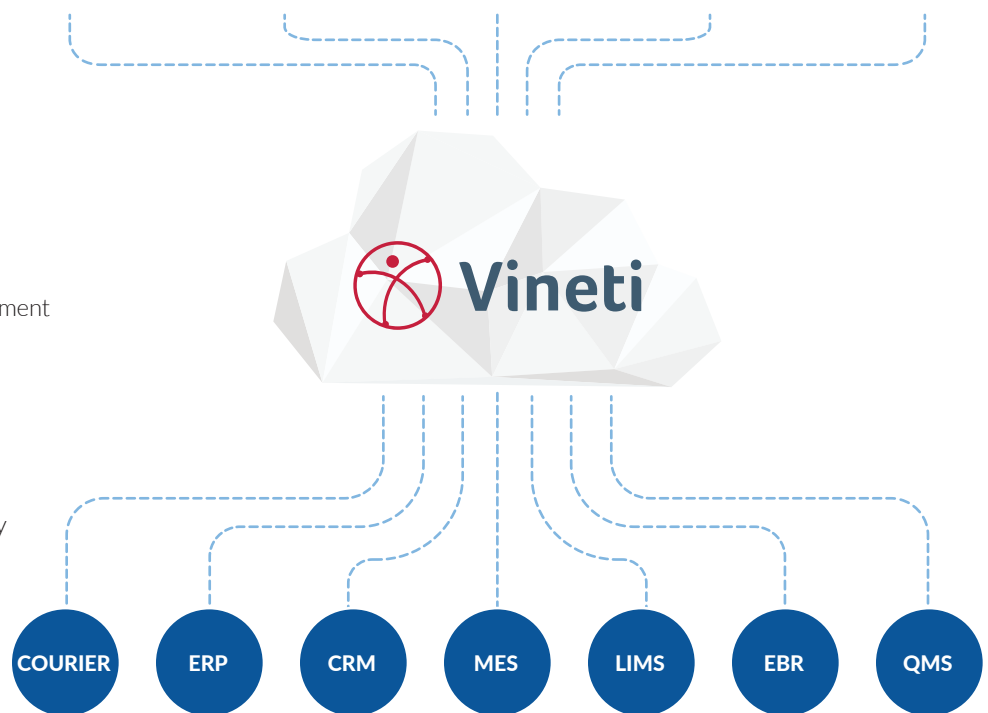

- Logistics and courier alignment

### REGULATORY AND QUALITY

- Chain of Identity and Custody traceability
- Compliance / validation security

### ANALYTICS AND REPORTING

- Enhanced data collection, visibility, and management
