PTM® Labeling and Printing

 Vineti

PTM — PERSONALIZED THERAPY MANAGEMENT

The modern solution for advanced therapy labeling

Keep every patient journey on track

A flexible approach solves complex labeling

PTM® Label Printing from Vineti™ delivers the advanced in-process and drug product labeling solution that cutting-edge therapies need. Built on the enterprise-grade, cloud-based Personalized Therapy Management® (PTM) platform, our Labeling and Printing solution combines the latest in digital technology with years of real-world experience in advanced therapy supply chain management to deliver unprecedented flexibility, simplicity, safety, traceability, and compliance.

This means every advanced therapy patient journey can stay on track, with flexible label printing options that work for every stakeholder—even when each part of your supply chain needs its own printing approach. Support any workflow or SOP, and simplify your supply chain orchestration. This is the industry's most comprehensive label printing offering and provides global scale out of the box.

Unprecedented flexibility. The PTM® solution delivers multiple options—pre-printed labels, in-process label printing—even on a per-site basis. The system supports a wide variety of label content types and standards, including ISBT-128 and SEC. In-process change management is built in, with support for scheduling changes and exceptions.

Industry-leading quality, compliance, and security. This solution is proven, delivering best-in-class digital traceability from the supply chain platform that has already managed thousands of commercial advanced therapy patient treatments. Every part of PTM® is based on real-world experience and industry best practices, with a foundation in patient safety, Chain of Identity, and Chain of Custody.

True "plug and play" compatibility. Works with a wide variety of printers—or with pre-printed labeling options. Install Vineti's cloud printers or use a stakeholder's existing printer via browser-based printing. Do your different stakeholders each need a different option? No problem. You can set up multiple labeling and printing options for every drug product workflow and each partner site.

Simple set-up. Want to use a stakeholder's existing printers? It's easy—with no complicated IT or requisition processes to manage. Whether via your own configured printers or an existing printer, your stakeholders—including Healthcare Providers—can just log in and print the labels they need for each patient and each therapy reliably, compliantly, and efficiently.

PTM® Labeling and Printing features

Our solution is essential for identifying, tracking, and manufacturing advanced therapies, ensuring standards, compliance, patient safety, data security, and a seamless patient journey. It solves the major obstacle that in-process labeling can present in the advanced therapy patient journey and streamlines patient treatments. Here are just a few of the key features.

- **Multiple printing capabilities**—print to any printer (via cloud or browser; cables or wi-fi), or choose a pre-printed labeling option, with the flexibility to choose different options for different stakeholders

- **Any label standard or design supported**, including SEC and the 2020 ISBT-128 updates

- **Variable mapping and data merging**—any variable, all admin-controlled

- **Change management capabilities** to support and manage the inherent variability in advanced therapy patient journeys—make changes to label templates in minutes with the user-friendly template tool

- **Quality and compliance**
  - + Industry-leading traceability, COI/COC
  - + Version control via central administration
  - + Built-in controls and auditability
  - + QA has the tools needed to manage label versions and push out across the network, ensuring that the correct and current version is being used across the network, and control which labels are being printed at a given location

- **Built-in security best practices** reduce risks for cloud printing; browser printing limits external exposure

Site-by-site flexibility
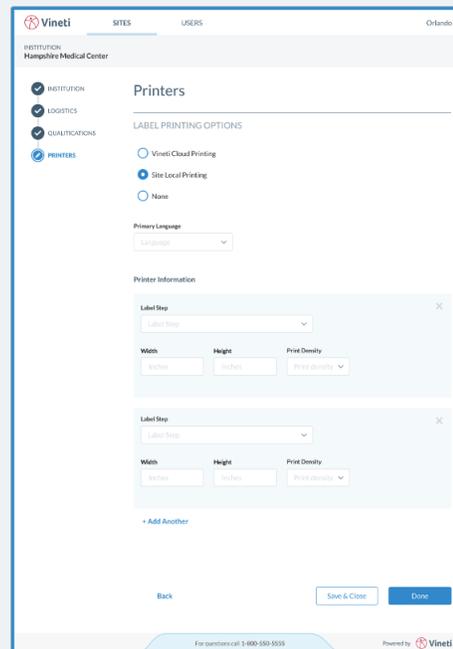

Administrator configuration for label printing options
Institution settings in Vineti include the ability to configure site-by-site printing options that include browser-based printing, cloud-based printing, or both. These printing configuration settings give administrators unprecedented flexibility to meet varying stakeholder needs.

PERSONALIZED
THERAPY
MANAGEMENT

The proven digital solution for advanced therapy supply chains

Vineti's Personalized Therapy Management ® (PTM) platform

The PTM platform is the foundation of Vineti's Labeling and Printing solution. PTM is the essential engine for advanced therapy supply chains. This industry-leading, purpose-built cloud service is trusted by biopharma clients worldwide to industrialize and scale advanced therapies, ensuring standards, patient safety, security, compliance, and a seamless customer experience. The PTM platform replaces outdated, costly, disparate, bespoke systems with a single enterprise-grade foundation for scaling personalized therapeutics worldwide, solving the challenges of medicine's most complex supply chain.
